Phone Number:

Pet's Name:

Animal Hospital:

Phone Number:

Attending Clinician:

Procedure Details (if applicable; MUST include which limb):

I have been advised as to the nature of the procedure above including the potential complications and risks thereof. I authorize Jennifer Swiderski, DVM, MS, DACVS-SA, a representative of Moves Managed Services Inc. (hereinafter "MOVES") to perform this procedure. I also understand that the above clinic/hospital (with the assistance of MOVES personnel as needed) will be using appropriate sedatives and/or anesthetics and medications needed to perform this procedure and will be responsible for monitoring my pet. I also grant MOVES and its associates the right to use, reuse, and publish in any manner, for commercial or non-commercial purposes the image, video, or likeness (the "Media") of the above-named animal. I waive the right to inspect or approve the finished product or copy of the Media and I release and discharge MOVES and its representatives all claims, actions, and demands arising out of the use of the media including any claims of invasion of privacy and libel.

Supplementary Consent to Off-Label Use of EXPAREL®

General Info

NOCITA® (bupivacaine liposome injectable suspension) for dogs and cats is a long-lasting analgesic for post-surgical pain. Unfortunately, disruptions in supply have led to an extended back-order and NOCITA may not be available for your patient's procedure. EXPAREL® (bupivacaine liposome injectable suspension) is a similar product in human medicine; it is still readily available and may be purchased by veterinarians, but EXPAREL has not been tested or approved for use in dogs and cats.

Known adverse reactions to NOCITA include discharge from the incision, incisional inflammation, vomiting, abnormalities on urinalysis, increased ALP, surgical limb edema, soft stool/diarrhea, inappetence, and fever. While no studies have been conducted on adverse reactions to EXPAREL among dogs and cats, you should assume that all the same adverse reactions are possible, as well as the unquantifiable risks associated with the off-label use of any pharmaceutical.

Referring Veterinarian Consent

I have been advised of the differences between EXPAREL and NOCITA and I understand that administering EXPAREL to a dog or cat is an "off-label" use of the drug. I understand the potential complications and risks involved in the "off-label" use of pharmaceuticals and I consent to the use of EXPAREL for the patient (pet) indicated below. I have also been advised of the additional cost associated with the use of EXPAREL compared to NOCITA, and neither I nor the hospital I represent will dispute the charges as invoiced by MOVES.

Signature of Referring Veterinarian
